

BUILDING THE FUTURE

PIPELIFE 
 **wienerberger**

COMPANY PROFILE

MORE THAN HALF A CENTURY AS IRELAND'S INDUSTRY LEADER

Pipelife Ireland is Ireland's leading manufacturer and supplier of plastic piping systems. Pipelife is a multifaceted manufacturer and supplier of plumbing, drainage, and plastic rainwater solutions for the utilities, residential construction, and agricultural industries. Our extensive product line is unmatched in Ireland.

Cork has been our home for over half a century, and it is here in our state-of-the-art production plant that Pipelife Ireland has become the industry leader, at the forefront of developing innovative new products and solutions. Our business philosophy has always been defined by quality and innovation. This is evident in the numerous cutting-edge systems and products we produce today. We recognise that continuous product excellence and customer satisfaction can only be guaranteed through ongoing product development and by maintaining five-star excellence in everything we do.

Pipelife is one of the world's leading providers of plastic pipe and heating solutions, with annual revenues of over €1 billion. We operate in 28 countries and employ 3,000 employees in 28 manufacturing locations, with further expansion planned. Pipelife is a wholly owned subsidiary of the world-famous Wienerberger Group, which generates upwards of €4 billion in revenue per year and employs over 16,000 employees worldwide in over 200 production sites.

Our unrivalled industry experience and financial stability ensure our clients have peace of mind and support in the future.

Put your trust in Pipelife: 55 years of proud Irish manufacturing & serving the Irish plumbing & heating industry. We provide current and future generations in Ireland and worldwide with safe, healthy, and carefree living.

REPUTATION:

WHY ARE WE IRELAND'S NUMBER ONE?

Guaranteed
Irish

Complete customer confidence

One of our philosophies is ensuring that our customers have complete confidence when they choose Pipelife. We achieve this by offering a one-stop shop for their needs with market-leading products, free initial advice, bespoke design, final commissioning, and 24/7 technical support. We are proud to be Ireland's top designer and supplier of home heating solutions.

Industry-leading service standards

We provide industry-leading service standards to all of our customers. How do we accomplish this?

- The unmatched experience and expertise of our Renewables Department
- The security of our design indemnity insurance
- Top-quality materials
- Comprehensive before and after-sales technical support
- Pipelife is fully accredited to ISO 9001
- Selling exclusively through retailers makes purchasing our products and services simple, professional, and stress-free.

Each project is individually tailored to your needs

Whether residential or commercial, our in-house engineers offer comprehensive designs individually tailored to each project. This includes extensive product and accessory specifications, energy-saving estimations, and heat loss calculations.

An unrivalled full-service experience

Pipelife offers a full-service experience to every customer with professional support and expertise from our customer service team and specialist service engineers.

Our in-house designers work with homeowners, contractors, architects, & consulting engineers across the country on projects ranging from residential homes, hospitals, and nursing homes to warehouses and car showrooms.

A nationwide distribution network in Ireland

You can find our full product range in all leading merchants throughout Ireland.

Our commitment to you!

Pipelife has been Ireland's leading and trusted supplier to the plumbing industry for the last 55 years. With this unmatched experience and the financial stability of being part of a leading multinational group, Pipelife Ireland offers complete support to our customers and full responsibility for the design of your system and the specification and supply of materials.

Peace of mind guaranteed

We also carry full design indemnity and product liability insurance covering all designs. When you choose Pipelife, you choose quality products, reliable systems, and Ireland's number-one after-sales commitment.

Speak to our professional team

QUALITY, BUILT IN

Long-lasting, safe and reliable products have always been the hallmark of the Pipelife name.

Pipelife is one of Europe's leading producers of plastic pipe systems. Pipelife has grown to become a key supplier of innovative products in the plumbing, water distribution, gas distribution and renewable energy industrial sectors.

Employing in excess of 3,700 people in 28 manufacturing facilities across 24 countries, Pipelife is a company with annual revenues of €1bn a year. Pipelife is a wholly owned subsidiary of the Wienerberger Group, with group revenues of over €4bn per year and 16,000 employees worldwide.

An Icon of Quality

On every product we make, you'll find the Pipelife monogram proudly stamped, as a mark of trusted authenticity and quality. And behind this mark is the most rigorous design, engineering and testing process that's helped build our trusted reputation for over 50 years. For complete quality control, we engineer everything in-house at Pipelife, including our own moulds, tools and machinery.

A Lasting Legacy

Long lasting quality has always been valued by our customers. But now it's a key attribute for the built environment, that's coming under ever increasing pressure to make sustainability its number one priority.

At Pipelife, we make products that help manage precious resources. Our aim is to minimise our impact on the environment and to grow responsibly, continually investing in reducing our carbon footprint across our facilities.

Quality and innovation continue to be the terms that define our philosophy and this is reflected in the range of products and systems that we manufacture to this day.

Put to the Test

To ensure performance at the very highest standards we have a state-of-the-art test lab. Here we batch check the quality of all our products. Pressure, thermal, endurance and impact testing are carried out, along with a full range of approvals to gain relevant accreditation.

Quality and Environmental Management Systems

Our goal is to produce the most environmentally friendly products, by lowering our energy and water use, raw materials and reducing our CO2 emissions. With quality management systems and environment measures established in all our production sites, our factories are certified according to ISO 9001 (Quality Management System), with a growing number of production locations meeting ISO 14001 Standards (Environmental Management System).

MAKE THE MOVE TO THE NEXT EVOLUTION OF PLUMBING PIPE

Qual-Pex PLUS+
EASY-LAY

Guaranteed
Irish

- **QUALITY YOU TRUST**
- **FLEXIBILITY YOU WANT**
- **VALUE YOU DESERVE**

5 REASONS TO USE OUR NEW QUAL-PEX PLUS+ 'EASY-LAY' PIPE

Our new Qual-Pex Plus+ 'Easy-Lay' Pipe is more than meets the eye. It's been specially designed for the installer. It's amazingly flexible, incredibly efficient & versatile system;

- **Ultra Flexible** – Our new Qual-Pex Plus+ 'Easy-Lay' Pipe is noticeably more flexible than other pipes. It's quick and easy to uncoil and the flexible material allows you to manoeuvre the pipe with complete ease. Increased flexibility delivers added value. Now easier and quicker to install using less materials and less labour. You save every time. Get the edge over your competition!

- **Proven & Guaranteed** – With our market leading 50 Year Guarantee offering you more certainty to install with confidence
- **Manufactured in Ireland** – Qual-Pex Plus+ 'Easy-Lay' is 100% Irish made and is manufactured to the most stringent standards allowing you to install with confidence. Plus with every purchase of Qual-Pex Plus+ 'Easy-Lay' Pipe you're supporting Irish Jobs!
- **Quality Choice** – You choose a quality product manufactured by a trusted leader of Plumbing & Heating Pipe in Ireland with almost 50 years' experience. Your next phase of Plumbing Success Starts here!
- **Versatile** – Qual-Pex Plus+ 'Easy-Lay' Pipe is designed to complement our existing ranges of Qual-PEX Plus+ 'Easy-Crimp' and Tectite fittings. The pipe is also recommended for use with standard brass compression fittings, and manifolds, as well as with some specific press and push-fit fittings. Available in Tan lengths and coils, in imperial sizes of 1/2" (14.7mm), 3/4" (21.0mm), and 1" (27.4mm), and white sizes of 16mm, 20mm, 26mm & 32mm. Qual-PEX Plus+ 'Easy-Lay' will be provided in 'Pipe-in-Pipe' 'Eco-Pex' & 'Eco-DUO' formats.

QUAL-PEX PLUS+ 'EASY-LAY' PLUMBING & HEATING PIPE

QUAL-PEX PLUS+ 'EASY-LAY' PIPE

CODE	DESCRIPTION	QTY
3096700000	100m x 1/2"	1
3096700020	50m x 3/4"	1
3096700040	50m x 1"	1

3096700030	3/4" x 6m	20
3096700050	1" x 6m	10

QUAL-PEX PLUS+ 'EASY-LAY' PIPE

- Qual-PEX Plus+ 'Easy-Lay' is approved for use under the following service conditions:
 - 12 Bar at 20°C
 - 4 Bar at 82°C
 - 3 Bar at 92°C
- Qual-PEX Plus+ "Easy-Lay" is designed to complement, with full compatibility, fitting ranges as follows:
 - o Qual-Pex Plus+ 'Easy-Crimp' Fittings
 - o Suitably approved 'Compression fittings'
 - o Tectite Fittings
 - o Suitably approved 'Press Fittings'
 - o Suitably approved 'Push-Fit fittings'

"I love the flexibility of the new Qual-Pex Plus+ Easy-Lay Pipe. The Lack of spring makes it easier to handle and makes the install a lot quicker. I have used all kinds of plumbing pipe but the Qual-Pex Plus+ Easy-Lay is by far the easiest to work with"

JOHN McHALE BUILDING SERVICES

QUAL-PEX PLUS+ 'EASY-LAY' PIPE IN PIPE

FEATURES

- Our Pipe in Pipe range comes pre-installed with conduit
- Simply uncoil, cut and install - No messy installation of the pipe in the conduit
- Saves you time, money and an environment where the chance of leaks are all but eliminated

Guaranteed
Irish

Pre-Insulated Qual-Pex Plus+ 'Easy-Lay' Pipe. From Pipelife, Ireland's leading manufacturer of Heating & Plumbing solutions.

Benefits:

- A pre-insulated Pipe to save time, money and energy costs for Domestic, Commercial and Industrial applications.
- Available in imperial sizes of 1/2", 3/4" & 1" in 50m Coils which are approved for use with Qual-Pex Plus+ 'Easy-Crimp', Tectite and compression fittings.
- Also available in sizes of 16mm, 20mm, 26mm & 32mm & are approved for use with suitably approved/certified Press-Fittings.
- Manufactured in Ireland.
- 50 Year guarantee.
- Available through all leading merchants.

PERFORMANCE CHARACTERISTICS

Thermal Conductivity

0°C	0.036 W(m - K)
40°C	0.040 W(m - K)

Wall Thickness of Insulation

6mm	STANDARD
-----	----------

Density

25kg/m ³	
---------------------	--

The Insulation:

The insulation is high quality insulation with a low thermal conductivity. It is highly efficient in energy conservation and frost protection. It is non fibrous and creates no dust during installation or use. It has a durable PE-film covering allowing maximum protection against water penetration and maximum bonding with concrete. It is also designed to give mechanical protection for in-wall cavity pipelines, which includes resistance to building materials and has a pleasing coating for exposed areas.

HEAT LOSS RATES (in W/M)

Hot Water Line Temp. 60°C - Ambient Temp. 15°C

Pipe Size	Insulation Wall Thickness	
	0mm	6mm
1/2" / 15mm / 16mm	33.38	13.45
3/4" / 22mm / 20mm	39.93	15.24
1" / 28mm / 26mm	45.25	17.88

Central Heating Line Temp. 75°C - Ambient Temp. 15°C

QUAL-PEX ECO DUO

Guaranteed
Irish

PRE-Insulated and Ducted Qual-PEX Plus+ 'Easy-Lay' Pipe for Local & District Heating.

Qual-PEX Plus+ 'Easy-Lay' ECO Duo Pipe has been designed to simplify and speed up installation by utilising standard Irish size fittings and pipe and to greatly enhance energy conservation, thus reducing energy costs.

- Irish size pipe eliminates the need for expensive adaptors.
- Use with standard compression fittings & Qual-PEX inserts.
- Manufactured in IRELAND.
- 50 year guarantee.
- Available in coils of 100m.
- Coils can be cut to order.
- Range of end caps available.
- Available in all leading Merchants.

Applications:

- Air/Water Heat Pumps.
- Geothermal Heat Pumps.
- Wood Pellet Boilers.
- Biomass & Biogas Boilers.
- External Gas and Oil Boilers & many more.

Product Description:

Two pre-insulated, Qual-PEX Plus+ 'Easy-Lay' Pipes encapsulated in 125mm of high performance insulation protected within a corrugated PE-HD twin wall outer casing for maximum protection. Delivering industry leading thermal insulation properties using Ireland's leading plumbing and heating pipe.

The Insulation:

The insulation of Qual-PEX Plus+ 'Easy-Lay' ECO Duo Pipe consists of micro-cellular cross-linked polyethylene foam with a closed cellular structure, permitting low water vapour diffusion with good insulation resistance to extreme temperatures. Moreover, Qual-PEX Plus+ 'Easy-Lay' ECO Duo Pipe maintains these high insulation properties over time. This is due to the superior characteristics of the cross linked PE foam, compared to other insulation materials (e.g. PUR foam) which show a decline in their insulation capabilities over time. Its unique moving layers design allows maximum flexibility and very easy installation.

Installation:

There are no special tools or fittings required as both sizes of Qual-PEX pipes will fit with standard compression fittings that can be bought in any Hardware outlet. Simply dig your trench, lay the pipe in a serpentine pattern in the trench and back fill with sandy clay. Allow 1% of the length of the pipe for expansion and contraction. Best practice would be to anchor the pipes at all fitting locations.

DESCRIPTION	VALUE	STANDARD
Density	28 kg/m ³	ISO 845

QUAL-PEX PLUS+ CLAMP TOOL – MILLIONS OF CONNECTIONS CAN'T BE WRONG!

The patented Pipelife clamp tool is an integral feature of the Qual-PEX Plus+ 'Easy-Crimp' System and ensures a simple, accurate, watertight joint every time.

As the tool clamps onto the aluminium sleeve, it 'work hardens' the section within the jaws of the tool, making a watertight joint and leaving a section of the aluminium sleeve on both sides still in the annealed state. This ensures that there is no stress on the pipe or the crimp fitting.

CRIMP TOOL

CODE	SIZE	QTY
3095210120	1/2"	1
3095210125	3/4"	1
3095210350	1"	1

Only compatible with Qual-PEX Plus+ 'Easy-Crimp' System manufactured by Pipelife Ireland.

Key Advantages

- Robustness in design and parts, combined with the variety of sizes and styles available, mean many years of service onsite.
- Extremely easy to maintain – simply clean and lubricate moving parts regularly.
- Case hardened, precision manufactured components used throughout the tool ensure that a consistent clamping force is applied throughout the life of every Qual-Pex clamp tool.
- Ensures a reliable, long-lasting, leak-free joint every time as clamping applies sufficient force to "cold form" each clamp ring that is clamped.
- Positive stop for clamping action ensures that the correct clamping force is applied to the joint every time, without requiring judgment on the part of the operator. This feature guarantees that Qual-Pex Crimp fittings will not be overstressed by the application of too much clamping force when making a joint.
- Well thought-out design ensures problem-free clamping of joints every time, even in those hard-to-get situations, with reduced incidence of 'angled clamping'.
- The Qual-PEX Clamp Tool is available in two sizes, 1/2" and 3/4".
- Pipelife Clamp Tools are supplied with a 12 month guarantee from date of purchase.

TECTITE

Tectite fittings simply push together in seconds to create a perfect joint. No blow torches, no solder, no heavy or expensive tools. Choose Tectite and you avoid the need to purchase and store gases, adhesives, fluxes, solders or any other materials or equipment.

- Irish Size Brass Push-Fit Fittings
- Push-fit installation = saves on time and money
- Easy to de-mount
- Easy application in hard to reach places.
- IAB Approved
- Unique IAB system certified with Qual-PEX
- 50 year Guarantee
- Easy installation
- Push-fit installation
- For use:
 - Mains feed
 - Pressurised plumbing systems
 - Open vented systems
 - Sealed Heating Systems
 - Hot & cold water systems

QUAL-PEX PLUS+ EASY-LAY PIPE – WHITE

Qual-Pex
PLUS+
EASY-LAY

Guaranteed
Irish

- Qual-PEX Plus+ 'Easy-Lay' Pipe is the next generation plumbing & heating pipe, for hot and cold water distribution services, as well as for central heating and underfloor heating systems.
- Qual-PEX Plus+ 'Easy-Lay' Pipe is extremely flexible, with exceptional lay-flat capability, enabling faster, easier and more cost-effective installations. This pipe has been designed to provide the plumbing professional with a 'universal alternative' to the various other piping products on the market, and it will prove to be a more effective plumbing solution, for many applications where aluminium pipe might otherwise be considered.
- Qual-PEX Plus+ 'Easy-Lay' is approved for use under the following service conditions:
 - 12 Bar at 20°C
 - 4 Bar at 82°C
 - 3 Bar at 92°C
- Qual-PEX Plus+ 'Easy-Lay' Pipe is designed to complement with full compatibility suitably approved/certified 'Press Fittings'.
- Qual-PEX Plus+ 'Easy-Lay' Pipe is available in the following sizes in both lengths & coils - 16mm, 20mm, 26mm & 32mm.
- Qual-PEX Plus+ 'Easy-Lay' Pipe enables the installer to undertake faster, easier and more cost-effective installation.
- Qual-PEX Plus+ 'Easy-Lay' can also be purchased pre-insulated - Qual-PEX Plus+ 'Easy-Lay' Eco.
- Is 100% Irish Made and is manufactured to the most stringent standards allowing you to install with confidence.
- 50 Year Guarantee.

Make the Quality Connection with our range of Qual-Pex Multilayer Pipe

Pipelife is delighted to introduce the newest addition to our renewable heating solutions family: Qual-Pex Multilayer Pipe & Fittings.

- ✓ Fully certified to BS7291-Class S
- ✓ WRAS approved for total peace of mind
- ✓ Trusted quality from the makers of Qual-Pex Pipe
- ✓ Market Leading 50 Year Guarantee

With this new range, specifiers and installers can have complete confidence in performance, reliability, and long-lasting results. To keep installers supplied with the right top-quality products, the range includes:

- Pipe sizes of 16mm x 2mm, 20mm x 2mm, 26mm x 3mm and 32mm x 3mm.
- Plain white and red or blue insulated coils.
- 25m, 50m, 100m, 400m and 500m coils.

Manufacturing Insights

Pipelife manufacturing process from start to finish, meaning that every coil of our Qual-Pex Multilayer Pipe is guaranteed from concept to delivery! Each aspect of the pipe is manufactured under the ISO 9001:2015 Quality Management System and our quality assurance team stringently tests performance throughout production. As a testament to our confidence and pride in our manufacturing processes, the new Qual-Pex Multilayer Pipe comes with a market-leading 50-year guarantee.

Each pipe is made of a layer of aluminium, sandwiched between two layers of Pert. The metal layer cleverly serves as an oxygen barrier and stops oxygen diffusion through a polymer matrix. This means that oxygen cannot dissolve into the water in the tube and corrode the metal components of the system. As well as offering optimum durability, the Qual-Pex Multilayer Pipe bends more effectively than conventional piping as the shape memory of the Pert is offset by the aluminium.

Pipelife Qual-Pex ML PRO – THIS IS WHY

- This is a more cost effective pipe system when compared with conventional piping systems
- All the combined advantages of metal and plastic pipes
- Lightweight, flexible and maintains its shape after bending
- Cost effective - requires less fittings than traditional methods
- *Frost resistance* - Due to their flexibility, our new multilayer aluminium pipes will simply expand in the case of frost. This reduces the break risk that may be posed by standard metallic pipes.
- *Low thermal conductivity* - The multiple layers of our new aluminium pipe system offer low thermal conductivity, reducing heat losses to produce energy savings.
- *Lightweight* - With a lightweight and flexible construction, handling, transport and installation of the Qual-Pex ML PRO Pipe is a breeze.
- *Noise reduction* - Whereas metallic pipes can produce significant noise at any water speed exceeding 1m/second, our new aluminium pipes stay quiet up to speeds of 2.5m/second.
- *Corrosion resistant* - Multilayer pipes contain a great number of chemical agents including acids and bases that are resistant to corrosion.
- *Longlife* - Even at high temperatures and pressure, the lifetime of the new Qual-Pex ML PRO Pipe can reach 50 years.
- *Suitable for drinking water* - the pipe's multiple layers retain the organoleptic properties of water, ensuring its use is allowed by European Union authorities.

COMPATIBILITY of the Qual-Pex ML PRO Aluminium Pipe System

The innovative Qual-Pex ML PRO Pipe is ideally suited for all domestic heating systems including underfloor heating and can be used with any suitably approved or certified Press fitting.

Qual-PexML Pro

Product description

16mm x 2mm, 20mm x 2mm, 26mm x 3mm and 32mm x 3mm AL-PERT multilayer pipes available in plain white & red and blue insulated coils. Available in 25M, 50M, 100M and 400M coils.

Field of application

Product is suitable for heating and plumbing applications for domestic, commercial & industrial applications in addition to drinking water applications.

Certification

Al-Pert is manufactured and tested in an ISO 9001:2015 accredited manufacturing facility and is certified to EN ISO 21003.

Material is WRAS approved for drinking water applications.

Product guarantee

Scope of the guarantee is for a minimum period of 50 years.

Pipe layering - technical information

1. Polyethylene inner pipe (PE-RT).
2. An adhesive layer bonding the inner pipe to the aluminum oxygen barrier.
3. Butt-welded aluminum oxygen barrier layer.
4. An adhesive layer bonding the outer pipe to the aluminum oxygen barrier.
5. Polyethylene outer pipe (PE-RT).
6. 6mm insulation available in red and blue.

Jointing

Pipes are suitable for jointing with press and compression fittings.

Key performance data

Max. Operating temperature: 95C.

Max. Operating pressure: 10bar.

Coefficient of linear expansion: 0.026 mm/m K.

Minimum bending radii: 5 X pipe outer diameter.

Oxygen diffusion: 0 mg/l.d.

Thermal conductivity: 0.43 W/mK.

PIPELIFE

Qual-PexML Pro

Product Overview

Every fitting features two EPDM O rings on each connection which, when pressed correctly, delivers a water-tight seal in seconds. Quick to install in three simple steps – Cut, Calibrate & Press, saving on time and costs as less fittings are required when compared with traditional plumbing methods. Qual-Press ML PRO Press fittings are designed for use in sanitary water supply and heating systems.

- Max Operating Pressure: 10 bar
- Max Operating Temperature: 95°C
- Max Peak Temperature (at 1 hour): 110°C
- Brass body manufactured from CW617N brass to EN ISO 21003.
- Suitable for use with the following pipes:
 - o Aluminium plastic composite /PE-X / PE-RT / PB/ Steel plastic composite
 - o Manufactured as standard for use with Aluminium plastic composite pipe.
- Operating Temperatures 0°C to 110°C
- 304 Stainless Steel sleeves
- Application class: 2/6 bar, class 5/6 bar
- Sizes: 16mm, 20mm, 26mm & 32mm –
- WRAS Approved
- TH profile
- EPDM O-rings

INSTALLATION INSTRUCTIONS

1. Cut

- Cut the pipe squarely to desired length using an appropriate cutting tool

2. Calibrate

- Insert the reamer into the cut pipe and rotate, pushing slightly to remove all burrs and rough edges. NOTE, a poorly calibrated pipe could damage the O rings on insertion.

3. Connect and Press

- Connect the pipe and fitting and check pipe is fully inserted in the inspection windows. The white of the pipe must be viewable through these holes.

DO NOT USE SEALING AGENTS SUCH AS PTFE TAPE OR JOINTING COMPOUND. Use TH Profile Jaws to press.

CREATE SUSTAINABLE VALUE

To help you meet the rising demand for sustainable buildings, we're developing energy-efficient solutions compatible with alternative sources of energy. Beyond this, we're striving to optimize our processes throughout the value chain and maximize the service life of our products while ensuring they can be recycled or reused at the end of their lifecycle.

ECOLOGICAL CHOICES WITH EPDS

Environmental Product Declarations contain standardized third-party verified data about the environmental impacts of products across their entire lifecycle. PIPELIFE has started working on the digitization of EPDs so you can easily compare the environmental impact of products from various suppliers.

ENERGY EFFICIENCY

Hydronic heating and cooling solutions are the energy-efficient alternative to traditional temperature management systems and are pertinent to achieving EU ambitions of a fully decarbonized building stock by 2050. Hydronic solutions can also be combined with various forms of alternative and renewable energy, including district heating and cooling as well as ground source and solar power systems. We are also making huge strides in the energy efficiency of our processes by reusing production off-heat, installing photovoltaic systems and utilizing closed cooling circuits.

BIODIVERSITY

Our contribution to preserving nature does not stop with the reduction of our CO₂ emissions or increasing our use of recycled materials. As part of the World of Wienerberger, PIPELIFE is working towards self-imposed Environmental, Social and Corporate Governance Goals. Accordingly, biodiversity measures are implemented at all our plants to encourage flora and fauna to flourish around our production sites.

REDUCED WASTE

As well as reusing scrap wherever suitable in our production processes, our prefab designs ensure your on-site waste is kept to the absolute minimum and can be seamlessly installed without the need for extra fittings, labor or energy.

MEASURING AND IMPROVING EFFICIENCY

We deploy industry 4.0 technologies to measure and reduce our energy and raw material consumption, as well as their related CO₂ emissions. Quality management systems and environmental measures are implemented at all PIPELIFE production sites, meeting national as well as international standards such as ISO 9001 (Quality Management System) and ISO 14001 standards (Environmental Management System).

MIDEA HEATPUMPS

• HOT WATER & HEATING

Our solution is a complete all-year round, integrated heating system which can replace, or work in synergy with traditional gas or oil boilers, maintaining continuous hot water supply up to 75°C even with out door temperatures as low as -20°C.

• COMPACT DESIGN

Our system is designed for installation in any type of property, especially homes with limited space. Our compact solution is a single unit that is installed on the outside of the property, taking up minimal space inside and can be used alongside an existing heating solution.

• EASY, SMART CONTROL

In-built smart controls and Mi Cloud software put you in total control whether you are in your armchair, at work, or on the way to the airport. The control with LCD screen can be used for multiple programming tasks, including the existing heating solution.

• PERFORMANCE

With the highest energy rating (A+++), even when at -7°C air temperature you can be sure that your Heat Pump is working hard to minimise your energy bills.

• EASY INSTALLATION & MAINTENANCE

All functions are achieved with a single outdoor unit, bringing significant cost savings. Furthermore, installation is quicker and easier as there is no need for refrigerant piping, and the product is pre-charged at the factory. Two-door design for easy access to internal components for easy maintenance.

• WHISPER QUIET

The Midea M Thermal Monobloc produces 35dB(A) sound pressure level at 3 metres.

• PEACE OF MIND

The Midea M Thermal Monobloc comes with an industry leading 10-year warranty.

PIPELIFE HIGH PERFORMANCE CYLINDERS

Pre-plumbed, indirect, unvented stainless-steel hot water storage cylinder.

The Pipelife Cased Pre-Plumbed Cylinder Heat Pump and hot water storage cylinders are designed for use with an air source heat pump as the main heat source. They feature a purpose-designed coil with a large surface area to allow maximum heat transfer of renewable energy into the stored water.

The Pipelife cased pre-plumbed cylinder can be installed neatly within domestic spaces of a property. Featuring aesthetically pleasing white panelling, the unit is easily incorporated into the design of most modern homes.

Pipelife Cased Pre-plumbed Cylinder

Features:

- High gain 200 litre capacity single coil
- Dimensions – 1828mm (H) x 600mm (W) x 630mm (D)
- Easy access for installation and servicing
- Fully pre-plumbed and pre-wired
- Premium quality white case finish
- All pipework connections are Irish sizes (Imperial)
- Domestic hot water zone that allows hot water priority and a two-zone heating, with an option for a third heating zone
- Heating and DHW expansion vessels are installed
- Pressure reducing valve installed and plumbed
- Automatic by pass fitted as standard
- Fast reheat and high insulation values, resulting in high efficiency
- Solid stainless steel coil
- User friendly system controls and display easily accessed
- Quick drain down system.

The new space saving, sleek and stylish Pipelife cased unit has been manufactured with top class materials. It has been developed to work seamlessly with our Midea Monobloc air to water air source heat pump range, ensuring homeowners can avail of an optimum efficiency, complete heating solution that can be relied on for many years to come.

The cased unit has been pre-plumbed and pre-wired for a domestic hot water zone that allows hot water priority and a two-zone heating, with an option for a third heating zone. As the unit is pre-plumbed and pre-wired, it is time saving and enables a hassle free installation for the installer. The quick recovery 200 litre capacity single coil Integrated Unit has a solid, stainless steel coil which will lead to a much faster heating and recovery time and factory-fitted 3 kW immersion heaters to provide back-up heat.

Pipelife Pre-Plumbed Cylinder

Features:

- High gain 200 & 230 litre capacity single coil
- Easy access for installation and servicing
- Fully pre-plumbed and pre-wired
- All pipework connections are Irish sizes (Imperial)
- Domestic hot water zone that allows hot water priority and a two-zone heating, with an option for a third heating zone
- Heating and DHW expansion vessels are installed
- Pressure reducing valve installed and plumbed
- Automatic by pass fitted as standard
- Fast reheat and high insulation values, resulting in high efficiency
- Solid stainless steel coil
- User friendly system controls and display easily accessed
- Quick drain down system.

HITACHI YUTAKI-S SPLIT COMBI HEAT PUMP

COMFORT AND EFFICIENCY

The Yutaki S is a split system which produces hot or cold water to supply radiators, fan coil units, underfloor heating or a combination of these. When connected to a tank, it can also be used to produce domestic hot water. The YUTAKI S heat pump consists of an exterior inverter unit connected to an interior hydraulic unit. In heating mode, the exterior unit absorbs heat from outside, even at very low temperatures (-20°C), transferring it to the water cycle by means of an interior hydraulic unit. It can produce a water temperature of 60°C at outside temperatures of up to -5°C. In cooling mode during summer, it operates the opposite way: heat is drawn outwards, towards the exterior.

- Split air-to-water heat pump comprising indoor and separate outdoor unit
- Domestic hot water and multiple heating/cooling settings – ideal boiler replacement technology
- Energy efficient
- Range includes 20kW and 24kW models for ultimate flexibility
- Suitable for heating swimming pools
- Available with electric auxiliary heating as standard
- Screed drying function ideal for new builds
- Easy-to-use wireless controller with one-touch holiday button and frost protection as standard.
- Weather Compensation Control
- Generate hot water up to 60°C
- DHW Legionella Protection Program
- ErP energy efficiency class of up to A++

PIPELIFE ECORAD

PANEL HEATER

The PipeLife EcoRad Electric Radiator combines modern heating performance with smart control. Designed for efficient and reliable comfort, EcoRad offers multiple heating modes - including Comfort, ECO, Anti-Freeze, and programmable weekly scheduling - ensuring warmth tailored to your lifestyle.

Its intuitive LED display and Wi-Fi connectivity (via Tuya Smart or Smart Life app) make operation simple, whether at home or on the go. Safety features such as overheat protection, open-window detection, and anti-freeze mode provide peace of mind, while its slim wall-mounted design saves space. With outputs from 500W to 2000W, EcoRad delivers energy-efficient heating (up to 94% seasonal efficiency) for rooms of all sizes.

KEY FEATURES

- Available sizes/outputs: 500 W, 1000 W, 1500 W, 2000 W
- Voltage / frequency: 230 V ~ 50 Hz, single phase
- Protection rating: IP24
- Heating modes:
 - Comfort mode (5–35 °C)
 - ECO mode (5–35 °C)
 - Anti-freeze mode (fixed 7 °C)
 - Weekly program (P1–P3)
- Functions & features:
 - Wi-Fi control (Tuya Smart / Smart Life app)
 - 24-hour timer
 - Open window detection
 - LED display with simple control panel
 - Group control (zone multiple heaters)
 - Child safety & overheat protection
- Certifications / compliance: CE, compliant with European EcoDesign and electrical safety regulations

HOT WATER HEAT PUMP

The Pipelife hot water heat pump provides domestic hot water in one integrated unit. Air is ducted in from outside to provide the energy for the heat pump cycle. This unit will provide energy efficient DHW and is very beneficial for improving BER Ratings in new and existing dwellings.

KEY FEATURES

- Internal hot water heat pump - no external unit required
- Space saving - fits in an 800 mm x 800 mm cupboard.
- Preplumbed cylinder.
- COP - 3.0
- Rated Heat Output - 1.25kW.
- EN16147 Tested.
- Standing Losses - 1.8 kWh/24hr
- Quiet operation - as low as 50dB
- Detachable top cover - easy access maintenance
- Colour touch screen control
- R290 Gas
- Flow Temperature up to 75°C.
- Backup heater for legionella cycle - 1.5kW
- Remote Access via Hitemp app

TECHNICAL SPECIFICATION

Weight	96 Kg
Ducting Connections	150 mm
Refrigerant	R290
Refrigerant Content	150 g
Cylinder Material	Duplex Stainless Steel
Water Heating Efficiency	129.3%
Max Power Input Immersion	1500 W
Energy Efficiency Class	A+
Power Supply	220-240V
Fan motor	DC Motor
Tapping Cycle	L
Air discharge	Vertical
Sound pressure at 1m distance	38.1 dB
Unpacked Dimension	640x640x1600 mm
Sound pressure at 1m distance	38.1 dB

PIPELIFE ECO TRAINING ACADEMY

KEEP UP TO DATE AND ENHANCE YOUR KNOWLEDGE...

Renewable Heating Systems have become an important area for the building services industry. Understanding how to provide these sources, systems and applications is seen as key in meeting the future needs of both commercial and domestic heating.

Expertise is vital to renewables success and so Pipelife are delighted to offer a range of courses that have been specifically designed to provide experienced heating, plumbing, installation and building professionals with a real understanding of the potential for renewable energy sources, installation and their application. Relevant, practical, industry-leading training courses delivered at our state-of-the-art Academy in Cork or Dublin by fully qualified professionals in a relaxed, informal environment.

The courses are free to attend and will be led by members of our Technical Team who have a wealth of practical knowledge and installation practices, and feature a detailed tour of the Pipelife manufacturing facility where visitors are given the opportunity to see first-hand where our products are designed and manufactured.

The free courses will be available to installers, service engineers, plumbers, merchants, architects, local authorities and BER Assessors. By offering a valuable insight into each of our heating technologies, those who attend our courses will be equipped with the best product knowledge and installation techniques, ensuring that our customers are fully satisfied. We are also a registered training provider with Engineers Ireland.

TRAINING COURSES

Heat Pump Training-

Intended for domestic heating and renewable installers who wish to know more about our Air to Water heat pump range. Training covers both the Hitachi Yutaki S Split Combi and Midea Monobloc Heat pumps. This course covers its construction, principles of operation, electrical wiring, controller settings, sizing, selection of the correct unit(s) to suit the property concerned, installation considerations, requirements and commissioning the complete system.

Underfloor Heating -

Intended for domestic heating installers of boilers or Air to Water Heat Pumps either with Underfloor Heating experience or those wishing to know more about Pipelife underfloor heating systems. This training course covers the basic principles of underfloor heating and the system design considerations, as well as full details of the Pipelife systems, their installation, filling, pressure testing and commissioning. Also included are full details of the Pipelife UFH control system, the options, operation, installation and set-up.

CPD TRAINING FOR ARCHITECTS, ENGINEERS, ENERGY ASSESSORS, ETC

Continuous Personal Development (CPD) is training we provide here and off site for architects, engineers, energy assessors and similar minded professionals. These certified courses are available in many technologies, give insight and knowledge on current and new products and areas for which are relevant to attendees.

Our course titles are -

- Underfloor Heating Systems Design & Control
- An Introduction to Air to Water Heat Pumps – Split Combi Unit
- An Introduction to Air to Water Heat Pumps – Monobloc

To book your training day with Pipelife please contact us at Ireland@pipelife.com, contact us on 021 4884700 or visit our website www.pipelife.ie/training

SEWER/UNDERGROUND DRAINAGE SYSTEMS

SEWER/UNDERGROUND DRAINAGE SYSTEMS

Pipelife Limited's Underground Drainage system is available in 110mm, 160mm, 244mm and 315mm. The system is designed for use in gravity drainage and sewage installations, and has been used for many years in large volumes with great success.

Our PVC-U pipes are supplied in secure bales, bound with straps within timber frames. We recommend that movement of bales is carried out by forklift or other mechanical device using webbing or rope strings.

Bales may be stacked to a maximum of 3 high, providing the timber frames are placed on each other.

Fittings are generally supplied in plastic bags and should be stored away from direct sunlight.

If stored outside, bags should be opened to prevent temperature build-up.

PVC FITTINGS

FIXED SEALING RING

No possibility to displace the sealing ring.

HIGH CHEMICAL RESISTANCE

Both for aggressive sewage and foul and storm water.

HEAT RESISTANT

Resistant to temperatures up to -45°C for constant flow.

EASY TO SHIP

Pipelife fittings are very light and yet have high stiffness making them easy to transport and place, which speeds up assembling.

CERTIFIED TO STANDARD EN 1401

SUPER SIZE SEALING RING VERSUS THE COMPETITION

Features of Pipelife AJ System –

- Certified to EN13598
- Easy above ground access for maintenance
- Easy installation and very robust with a life time expectancy of 100+ years
- Riser shaft marked to facilitate cutting to achieve input depth
- Installation depth up to 0.6 metres
- Produced for more than 10 years with large quantities of the chambers installed and operated throughout the country
- Inlet and outlets made to accept pipes made to Sn4 and Sn8 specifications
- 12 options to suit every requirement plus a multibase option

Pipelife 'Integrity 600' IC Manhole & Chamber

Our New Pipelife Integrity manholes and chambers offer strength, durability and resistance to abrasion and high temperatures, ensuring a reliable long service life. Thanks to their lightweight material they are very easy to install without the use of heavy machines, and provide an ideal solution for sewage and stormwater applications in various ground and water conditions.

Our Pipelife Integrity manholes offer a wide range of connections to the base and riser rings. In practice, engineers can design their ideal manhole. Water tightness is also guaranteed with rubber sealing rings, even if groundwater levels are higher.

Manufactured to EN 13598 standard

New Product Range

Pipelife 'INTEGRITY 600' IC Manhole & Chambers

FLEXIBLE AND WATER TIGHT INSTALLATIONS

Our New Pipelife Integrity manholes and chambers offer strength, durability and resistance to abrasion and high temperatures, ensuring a reliable long service life. Thanks to their lightweight material they are very easy to install without the use of heavy machines, and provide an ideal solution for sewage and stormwater applications in various ground and water conditions.

Our Pipelife Integrity manholes offer a wide range of connections to the base and riser rings. In practice, engineers can design their ideal manhole without being constrained by standard inlet-angle configurations. Water tightness is also guaranteed with rubber sealing rings, even if groundwater levels are higher.

PIPELIFE INTEGRITY MANHOLES ARE IDEAL FOR:

- Sewage revision and inspection
- Connecting sewers on different levels
- Changing the direction of the sewer path (horizontally and vertically)
- Changing the slope and vertical section of a sewer pipe
- Draw tanks for sewage pumping station
- Energy reduction
- Water meter manholes
- Revision and inspection of telecommunication and power networks
- Industrial-specific needs

110MM DOMESTIC CHANNEL DRAINAGE POLYPROPYLENE/ABS

Suitable for domestic areas where surface water collects:

- Driveways and pathways
- Patios and conservatories
- Swimming pools and sports areas
- Gardens and water features
- Retaining walls

- Quality domestic surface Channel Drainage 110 x 100mm
- Anti-slip heel guard rating
- Garage Pack available, see above
- 1.5 tonne point load, 5 tonne spread load
- 4 outlets per length for maximum flexibility
- Quad section for corners and junctions
- Concave grid for maximum flow

**Channel-1 Metre Length
with Plastic Grate**

PVCu EXPANSION JOINT FOR CONCRETE

- Designed and manufactured in Ireland by Pipelife.
- Produced using high quality PVCu material.
- Works by principle of specifically designed hollow structural section absorbing expansion of concrete.
- Simplicity of use and lightweight design saving time and labour.
- Can be used as a sliding guide to power screeding.
- Suitable for factory flooring and roadside footpaths.
- Aids in the plumb levelling of finished concrete.
- Once laid, no further time consuming aesthetic work necessary.

Width: 60mm / Height: 80mm

Available in 3 and 5 metre lengths
